SCREEN PRINTING

Screen printing is a printing technique whereby a mesh screen is used to transfer ink onto a substrate. This is the most common method of imprinting on promotional items and apparel.

EMBROIDERY

Embroidery is stitched with a computerised embroidery machine using patterns digitised with embroidery software. Artwork must first be digitised, which is the specialised process of converting two-dimensional artwork into stitches.

HEAT PRESS

Heat press is imprinting a design or graphic onto a substrate, with the application of heat and pressure for a pre-set period of time.

DOMESTICKER

Digitally printed directly onto a vinyl adhesive substrate that can be cut into a variety of shapes and sizes. The stickers are then coated with a polyurethane to give a dome-like appearance creating a 3D effect.

ONFACTS

CORPORATE GIFTS VS PROMOTIONAL GIFTS

VS

CORPORATE GIFTS

PROMOTIONAL GIFTS

VS

PERSONALISED RECOGNITION

- We use corporate gifts to show appreciation, enhance corporate image, and create goodwill among customers, personnel, suppliers and essential stakeholders.
- Corporate gifts are usually of a higher value, bought in smaller quantities and are given to recipients to acknowledge a specific event.
- Corporate gifts require more thought and personalisation to be successful.

POWERFUL COST-EFFECTIVE BRAND AWARENESS

- The goal of a promotional gift is to build brand awareness and are aimed at a much broader audience.
- Promotional gifts are an ongoing advertisement for your brand. These gifts are bought in bulk.
- Promotional gifts are less expensive and need to be practical as the intention is that a large audience will find these items handy on a daily basis
- Corporate gifts require far less personalisation.

To determine whether you should consider a corporate gift or a promotional gift, think about your end goal: are you trying to strengthen a relationship (corporate gift) or get your brand into as many 'new' hands as possible (promotional gift)? Your goal defines which gift is the appropriate choice. Choosing the right corporate gift can be daunting. You want something that truly stands out from your competition and firmly positions your company in your recipient's good books

KNOW THE DIFFERENCE! DON'T CONFUSE THE 2!

ON FACTS

RETURN ON MARKETING INVESTMENT

In this day and age, you should be able to get a better handle on your advertising- including promotional products so that you can measure its ROMI and determine which part of it is being wasted.

Here are 5 simple ways to measure the ROMI of your promotional products:

HAVE A CALL TO ACTION

- This can be "Call us at...", "Enter Promo code 123XYZ to register to win", "Visit us at...", "
- Like us on Facebook...", etc.
- Ask these people to take some simple action steps so that you can measure its effectiveness

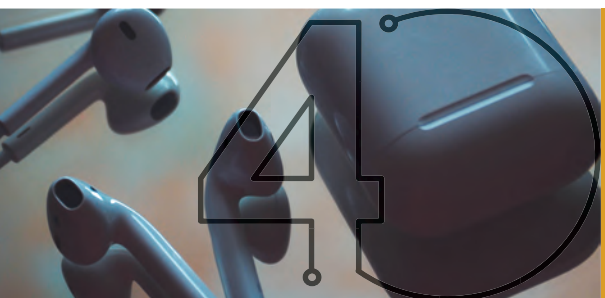

URL CODE & NUMBERS

This is similar to having a customised landing page. If you use a special Google Phone number that is only advertised on the promotional item, then it makes it easy to measure calls. Same for a unique URL. Google Analytics can easily tell you traffic counts and other details—giving you measurable results that can help you improve your ROMI.

RUN A/B STUDIES

- Test various aspects of your promotional product campaign—including different messages, imprint colors, product colors, promotional products and distribution plans (trade shows, handouts, direct mail).
- Test, test and test again until you constantly improve your ROMI on these promotional products. Don't assume it is any one specific element until you can come up with proof.

DO A MULTI-PART PROMOTIONAL PROGRAM

We have had clients mail out earphone cases before trade shows with a note to bring these in at the upcoming trade show to receive the missing earphones. Same with pairs of imprinted sneakers. We would send out one sneaker and ask the recipient to call their sales consultant listed on the form to receive the missing sneaker on a follow up visit. Multi-part promotions can get you measurable results that will boost your ROMI.

ACTUALLY MEASURE YOUR ROMI

Don't forget to track and measure the effectiveness of your promotional products so that you can improve the results next time. It isn't so much to measure the ROMI just for measurement sake. It is only a useful metric if you are constantly tweaking your efforts to get your improved results from promotion to promotion. You can consistently improve your ROMI on your promotional product budget by following the above 5 simple proven steps.
